

# Teknasyon's Successful Migration from AWS to Google Cloud

NGC played a key role as the cloud transformation partner in Teknasyon's migration journey. From architectural design to hands-on execution, we guided every step of the transition to Google Cloud.

## The challenge

Teknasyon faced increasing costs, resource limitations, and performance issues with its previous cloud provider. Frequent errors during high IOPS demands, limited scalability, and reduced architectural flexibility prevented the infrastructure from meeting modern business needs. These challenges negatively impacted operational efficiency and restricted innovation capabilities.

## The solution

With NGC's guidance, Teknasyon migrated to Google Cloud and rearchitected its infrastructure. Key steps like data migration, integration, and security were completed with minimal downtime. GKE and monitoring tools streamlined operations, supported by strong DevOps collaboration.

## The result

Following the migration, system stability improved significantly, error rates dropped, and response times shortened. Performance gains were clearly noticeable, with IOPS-related issues fully resolved. Enhanced architectural flexibility, improved observability, and increased cloud capabilities strengthened Teknasyon's agility and technical capacity.

This comprehensive cloud transformation not only enhanced Teknasyon's system stability, performance, and agility but also played a key role in supporting the global growth of its products, which have been downloaded millions of times worldwide, reflecting the scale and impact of this digital evolution.

# TEKNASYON

## About Teknasyon

Teknasyon is a global tech company behind 150+ products and 3.5B+ users. With hits like GetContact, Lisa AI, Rockads, Zotlo, and Desk360, and a strong culture of innovation, it's recognized as a top workplace in Europe and Turkey.

Vertical/horizontal solution: Software & Internet

Primary project location: Turkey

## About NGC Bulut Bilişim Hizmetleri A.Ş.

NGC is a Google Cloud Premier Partner that actively uses what it delivers. We guide and grow with our customers — together.
